

THERMOS

HVAC Products and Materials - H&H Acoustic Construction Division

THERMOS

Hodgson & Hodgson Group Limited

Hodgson & Hodgson Group has been in existence for well over a century and has made its business out of noise control. The Group operates three complementary Divisions, H&H Acoustic Construction Division, H&H Acoustic Components Division and H&H Acoustic Consultancy Division across eleven UK locations; its objective, to provide a complete portfolio of high quality acoustic products and services, a "one stop shop" for solving the problems caused by unwanted noise.

The THERMOS Range

Buildings today utilise an extensive range of mechanical services (i.e. heating, ventilation and air conditioning - commonly known as HVAC). The insulation of such services is essential to ensure the comfort and health and safety of occupants, it will also create considerable savings in building operation costs. Hodgson & Hodgson has extensive experience in working alongside building services engineers to ensure specification of the right solution. The **THERMOS** range has been developed over many years and provides a wide choice of products and materials designed for the thermal and acoustic insulation of HVAC systems including pipe and duct lagging, flange and valve covers and a selection of ancillary pipe content identification labels.

Supporting Services

Hodgson & Hodgson Consultancy Division is able to provide analysis, design and evaluation of proposed building services / HVAC systems together with specification advice on appropriate noise control measures. Telephone 01473 824452. Highly qualified engineers are available for site visits and to offer advice and assistance to engineers on all aspects of noise control and current legislation/building regulations to ensure specifications and acoustic performance requirements are achieved.

Don't Forget

H&H Acoustic Construction Division markets the full range of branded architectural noise control products.

 **ECOMAX** for ceilings

 **SALEX** for walls

 **REDUC** for floors

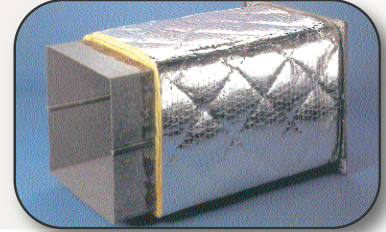

Consult Individual product summary brochures for further information.

The Products

This brochure is provided by way of an introduction to **THERMOS**. For detailed technical information consult our website www.acoustic.co.uk where individual data sheets and installation guidelines are available for download, together with project case studies and NBS clause details. Alternatively, telephone 01664 821810.

THERMOS MuftiLag

Acoustic blankets designed to control noise breakout from ductwork.

THERMOS Isogenopak

Rigid PVC film designed to clad internal insulated pipes and ducts.

THERMOS Capital End-Capping

End-capping for the exposed ends of insulated pipework.

THERMOS Valve Jackets

Tailor made jackets for the thermal and acoustic insulation of pipe valves.

THERMOS Ceiling Tile Pads

Perforated metal ceiling tile infills for acoustic, thermal and fire protection.

THERMOS Identification

Pipe content identification labels, tapes and bands.

Other Materials

A fully comprehensive selection of foams, laminates, barrier mats and damping sheets are available in support of the **THERMOS** range. Further details available on request.
